TECH INFO	ORIGIN From the classic wine-producing area of Gambellara. The name "Capitel" is a tribute to the Saint Freedom (Santa Libera) shrine, just around the corner from our winery.	HARVEST Mid-September, handpicking and careful selection of our highest quality grapes.
	SOILS Volcanic	WINEMAKING The Garganega grapes undergo a desiccation process using the traditional Picai method. This involves meticulously braiding long strands of twine and suspending clusters of Garganega grapes on the walls, known as "Picai". The gradual withering of the grapes persists for a duration of four months.
	GRAPE VARIETY Garganega 100%	MATURING AND AGING Once the drying process is over, the grapes are positioned in a manual wine-press and gently squeezed. The residue (must) is slowly fermented in small 228 liter French oak barrels for about a year. Following this aging process, the wine is left to mature for one year in concrete tanks, allowing it to undergo further development. Aging: 1 more year in small French oak barrels. Fining: 6 months in bottle.
	TRAINING SYSTEM Pergola	
AVERAGE AGE OF VINES 30 years
